International Journal of Fracture

CONTENTS OF VOLUME 39 (1989)

Vol. 39, Nos. 1–3, March 1989

F.W.B. VAN EYSINGA	Preface – 25th Anniversary Issue	vii
Editorial Committee	Foreword – Professor M.L. Williams at 65	ix
K.B. BROBERG	The near-tip field at high crack velocities	1
C.W. SMITH, J.S. EPSTEIN and M. REZVANI	Measurement of dominant eigenvalues in cracked body problems	15
E.S. FOLIAS	On the stress singularities at the intersection of a cylindrical inclusion with the free surface of a plate	25
DANG DINH ANG and ALAIN PHAM NGOC DINH	Some viscoelastic wave equations	35
W.L. KO	Application of fracture mechanics and half-cycle theory to the prediction of fatigue life of aerospace structural components	45
H.W. LIU	Fatigue crack growth by crack tip cyclic plastic deformation: the unzipping model	63
E. VON MEERWALL and F.N. KELLEY	Use of parametric models in designing polymeric materials to specifications	79
R.J. FARRIS and M.S. VRATSANOS	Impulse viscoelasticity: a new method to study polymerization of thermosets	93
L.C. YANYO	Effect of crosslink type on the fracture of natural rubber vulcanizates	103
A.S. KRAUSZ and K. KRAUSZ	The conceptual physical framework of stochastic fracture kinetics	111
DANG DINH ANG, T. FOLIAS, F. KEINERT and F. STENGER	Viscoelastic flow due to penetration: a free boundary value problem	121
F.E. PENADO and E.S. FOLIAS	The three-dimensional stress field around a cylindrical inclusion in a plate of arbitrary thickness	129
J.G. WILLIAMS and M.N.M. BADI	The effect of damping on the spring-mass dynamic fracture model	147
R.A. SCHAPERY	On the mechanics of crack closing and bonding in linear viscoelastic media	163
G.P. ANDERSON and K.L. DeVRIES	Predicting strength of adhesive joints from test results	191

R.G. STACER and H.L. SCHREUDER-STACER	Time-dependent autohesion	201
K.M. LIECHTI, E.D. BECKER, C. LIN and T.H. MILLER	A fracture analysis of cathodic delamination in rubber to metal bonds	217
G. RAVICHANDRAN and W.G. KNAUSS	A finite elastostatic analysis of bimaterial interface cracks	235

Vol. 39, No. 4, April 1989

R.M.V. PIDAPARTI, T.Y. YANG and W. SOEDEL	A plane stress finite element method for the prediction of rubber fracture	255
O. KOLEDNIK	Plastic and overall rotational factors in bend- and CT-specimens	269
K. WATANABE, S. TANI, S. YOSHIOKA and Y. YABE	Evaluation of initiation condition of creep crack growth by the crack energy density	287
S.W. FOWSER and T.-W. CHOU	Simplified Greens functions for mode I and II cracks	301
S.W. MA	A central crack of mode III in a rectangular sheet with fixed edges	323

AUTHOR INDEX, VOL. 39 (1989)

Ang, Dang Dinh, 35, 121
Anderson, G.P., 191
Badi, M.N.M., 147
Becker, E.D., 217
Broberg, K.B., 1
Chou, T.-W., 301
DeVries, K.L., 191
Dinh, Alain Pham Ngoc, 35
Epstein, J.S., 15
Farris, R.J., 93
Folias, E.S., 25, 129
Folias, T., 121
Fowser, S.W., 301
Keinert, F., 121
Kelley, F.N., 79
Knauss, W.G., 235
Kolednik, O., 269
Ko, W.L., 45
